

# CHAK INU

Decentralized Smart Staking Hyper Deflationary Meme Token.

*THE ALDOGE KILLER! \$CHAK*

# CHAK INU - A Decentralized Smart Staking Hyper Deflationary Meme Token

A Challenge in the BSC Network to build a working perpetual Community-driven Ecosystem.

*First of all please read the idea..*

<https://medium.com/@chakinu>

To be honest I was inspired by a guy who first make this idea work so here I am idealizing another potential idea in the BSC network this time.

## - INFOMATICS

**\$CHAK** is a BSC experimental meme token that don't promise anything at all.

This is not an investment scheme!

We don't advise you to speculate on it or make it as your sole assetry. People can join in this experiment anytime and can get out anytime if they want.

It is a meme socio-experimental idea to challenge on how a decentralized community can push such idealistic nature of **DeFi** and **DAO**.

## *The Question is will it work?*

We know how it works now and we can emulate such ideas good or bad to produce a better idea. CHAK INU is a hyper deflationary token just like any other that gives us rewarding bonus when holding and taxing the whalers when selling or dumping thus it created a good ecosystem for something good soon. Sending tokens is also taxable with the burring mechanism of CHAK INU.

From Dupe to Innovative one it might really work if we put our mind into it as a decentralized community building trustless yet trusted Ecosystem.

## - THE ALDOGE KILLER

We call it an Aldoge Killer in its goal to beat all doge token out there to be a title of the future.

The aim is to challenge them in the decentralized system of market making it the Aldoge killer of all time.

**CHAK INU** is a baby project that will be matured soon in around **2022** so please take care of it!

## REWARD SYSTEM

The rewards system is quite compact as it rewarded the hodler while it punished the dumper making it more like a hodl and wait for \$CHAK mass adaption. By the time 5% was burned again and again the total supply will be lessened from Trillion, to Billion, and Million in no time. Trade and Hold don't dump! It will help either you lose more than you what you should gain.

## RANKING SYSYEM

Soon we can also have ranking system depending on the community standing of such anonymous or pseudonymous member of our community.

## - THE ECOSYSTEM

**CHAKSWAP**

**CHAKNFT**

**CHAKRITY**

The idea is to build a working decentralized system in the Binance Smart Chain. Cost fee is lower than its counterpart the ERC token by 15:1 mostly hence we pick this one as our temporary mainnet building the idea from ground to top.

### **CHAKSWAP**

The first use-case of such meme token is a DeFi CHAKSWAP using its own currency as the main token used on staking and farming CHAK-LP.

### **CHAKNFT**

This is the next one to its ecosystem and by building an effective NFT based on BSC is challenging. The idea is to build a platform that can help artist alike join the NFT craze with ease debunking the barrier of higher gas fees in the Ethereum network.

### **CHAKRITY**

The Charity and giving hand of CHAK INU is the most important here that can be used to save lives and nature. Helping our world through Charity is not bad at all especially in times of pandemic and chaos.

## - TOKENOMICS

**Total Supply: 1,000,000,000,000,000**

**Symbol : CHAK**

**Decimals : 18**

**5% Reflection / Hodl Bonus**

**5% Fee LP Tax**

**5% Monthly Burn**

**5% Burn TX forever!**

**Verified Contract Address:**

<https://bscscan.com/address/0x6775592C0DAfe461AAC94b9AdDFCD84b7aCf67F5>

**50% LP Lock!**

**50% burnt offering to vB!**

<https://bscscan.com/tx/0xf801632516dbeab35c3bb692b7f02fc655d7c209248c35fa4a88993cb2873cde>

**Ownership Key Thrown as NFT!**

The idea is quite simple, the founder can renounce it anytime but still waiting for pancakeswap v3 to change router first. So it is better to convert it into NFT and pass it with the next most trusted community holder of Key then renounce it later on. We can save the project while waiting for the final stage of renouncing it.

**You can Buy/Sell \$CHAK :**

Slippage 17-21 Starting in June6 +6 UTC

<https://exchange.pancakeswap.finance/#/add/0x6775592C0DAfe461AAC94b9AdDFCD84b7aCf67F5/BUSD>

\$CHAK is a BSC Token, and no official ERC20 aka Ethereum Token of it from the first batch community.

***Renounce Key Asap!***

***Community-driven!***

***Decentralized!***

***No Team Token!***

***No Leader!***

## - A CHALLENGE

This should be a good challenge to test it out if it can work in the Binance Smart Chain. By combining forces we can surely make this happen in a year or so.

Will Decentralization work?

Can it really kill all those dog tokens? We will find that out...
